

INVENTORY

In the Fall of 2006, the WMTH Corporation inventoried the recreational offerings throughout the county and UK Cooperative Extension Office for McLean County assisted in mapping each of these. The information was then posted on a website created by WMTH at trailsrus.com/mcleancounty/recreation.html and residents were encouraged to visit the site and become familiar with the many recreational offerings already available in each of the communities. This was an important step. To create a master plan for the development of Myer Creek Park, one first needed to know what the rest of the county had to offer to avoid duplication. In the inventory process, it was determined that a number of the existing baseball fields and a few basketball and tennis courts throughout the county were in need of repair. The McLean County Fiscal Court provided funding to address each of these concerns before they allocated money to build new facilities at Myer Creek Park.

Below is a map of the many recreational offerings throughout McLean County with a summarized list on the following pages along with a more detailed breakdown towards the end of the chapter.

INVENTORY (continued)
